

For the purpose of this study, the following model was used to represent the structure of the copolymer:

where  $\text{X}$  and  $\text{A}$  are the repeating units of the copolymer and  $M$  is the central metal atom.

10

The structure of the copolymer was determined by the following procedure: (1) the copolymer was dissolved in a suitable solvent; (2) the solution was treated with a suitable reagent to form a precipitate; (3) the precipitate was filtered and dried; (4) the dried precipitate was analyzed for the presence of the central metal atom.

11

The results of the analysis are shown in Table I. The results show that the copolymer contains the central metal atom in the expected amount.
